

OCZ ModStream Power Supply OCZ45012U 450/550-Watt

Description

The OCZ ModStream OCZ45012U power supply is the quietest, sleekest, most versatile PSU available today! The ModStream OCZ45012U comes in 450W configuration with 550W peak loads; they are the ideal solution for PC-users desiring a high-quality mix of power and versatility in their system.

Every ModStream is equipped with OCZ EZMod technology. This advanced cable management system allows you to truly customize your power system to utilize only the UV cables you require, resulting in optimal airflow and the coolest possible environment within your case! All EZMod cables glow brightly when illuminated with UV lighting accessories.

OCZ knows that high performance doesn't have to come with annoying fan noise! Each ModStream is built with PowerWhisper technology to significantly reduce noise levels to virtual silence, making this the quietest power supply on the market. Experience leading edge reliability and performance with increased air flow, courtesy of a whisper quiet, yet extremely vigorous 120mm fan complete with attractive blue LEDs.

The OCZ Modstream features PowerShield EMI control technology with copper shielded power leads to provide the added benefit of extreme current stabilization and delivery of the cleanest possible output to all your critical system components.

OCZ offers an exclusive 3 year PowerSwap warranty program and industry leading technical support, providing unparalleled peace of mind!

Specifications
